

Why Premier Industries is the Only Choice for All Things Evaporative Cooling

In the recent past, the conversation around indoor air quality, and cooling has picked up some pace. At the core of the conversation is how best to cool a given space while also maintaining annual cooling costs at a low. Although evaporative cooling is one of the oldest forms of climate control, it still offers numerous advantages. In terms of costs, the devices are relatively cheaper to install, have minimal operating costs, and are easy to maintain.

We are also eco-friendly, deliver fresher air, feature quiet operation, and allow you to leave your doors and windows open while the system is on.

Premier Industries, Inc. has been dealing in evaporative cooling systems for over three decades. Our experience in the industry enables us to provide excellent products, as well as friendly and quality service at affordable prices. But who exactly is Premier Industry, Inc.?

Who is Premier Industries Inc.?

Premier Industries Inc. is a small, locally owned and operated business based in Phoenix, Arizona. Founded in 1983, the business specializes in designing, and manufacturing evaporative coolers and air filtration systems. With the professional experts that the business employs, coupled with the extensive experience accumulated over the years, Premier Industries strives to provide top-quality cooling equipment that helps to keep your space cool when it becomes hot outside. Over the years that we have been in operation, we have not only worked hard to expand our range of products, but also our geographical reach. Today the business serves throughout the Western United States.

Apart from designing and building efficient equipment to meet a variety of needs, we also build high-quality custom cooling equipment that is tailored to the unique needs of our customers. To ensure you enjoy maximum comfort, we also sell a wide range of accessories. Our cooling experts have the knowledge, skills, experience, and tools to handle any job regardless of how small or big it is. If you are looking for an efficient, affordable, and innovative way to keep your space cool, you should trust us to offer the best cooling solutions for your space. With our deep knowledge of the industry, we will work with you to ensure the evaporative cooler you choose will help meet your goals.

Services We Offer

At Premier Industries Inc. we understand that the needs of our customers vary widely. As such, we offer a wide range of services to meet these needs. Below are the options and features we make available.

Industrial Evaporative Coolers

Temperature plays a critical role in affecting the productivity of workers in their workplace. Since productivity can have a measurable impact on business profitability, it is important to create a productive working environment for your staff.

We manufacture and sell high quality industrial evaporative coolers to meet the needs of any industrial space. The equipment is cost-effective, efficient, long-lasting, and suitable for heavy-duty industrial applications. Our line of industrial evaporative coolers features stainless steel construction, efficient cooling media, and vibration isolation system. We also have larger units, and custom-designed units for a wide range of applications.

In case you are looking for an industrial evaporative cooler with special capabilities or dimensions, get in touch with us for more information on our customization options. We stand by the quality of the products we manufacture, offering warranties on components as well as against leakage caused by rust.

Commercial Evaporative Coolers

Our commercial evaporative coolers are designed to offer powerful cooling for your commercial space. Premier Industries Inc. ensures that the equipment is just as long-lasting as our industrial evaporative coolers, without added weight or costs. This allows you to meet your commercial cooling needs without having to worry about higher energy costs.

As a small, local business, we know that business owners are constantly looking for ways to cut back on costs without compromising efficiency. Our commercial evaporative coolers are designed and made to help you achieve just that. Some of the notable features of these coolers are stainless steel construction, efficient cooling media, a variety of models, and forward curve blowers. When it comes to the fan section, you get stainless steel housing, a removable panel that offers easy access to the fan housing, industrial-grade blower, and a heavy-duty motor.

We are confident of the capabilities and construction of our commercial evaporative coolers, and offer a 10-year rust-through warranty. As such, when you buy our cooling system for your commercial space, you can rest easy, knowing you will enjoy reliable performance.

Residential Evaporative Coolers

Our evaporative cooling options are not limited to industrial and commercial spaces. We are proud to have a line of quality products that deliver comfort and efficiency to residential spaces. If you live in an area that experiences dry, hot conditions, these evaporative coolers will make your residence bearable in the summer, ensuring that you are not overheated and can go about your daily activities.

The available options include slide-in faceplate, thermostat for exclusive water and energy saving pump control, motors in 230V and 480V, as well as stainless steel legs with adjustable anchor plates. The evaporative coolers have a number of features to ensure their efficient and dependable performance. These include all stainless steel housing, heavy-duty motor, heavy-duty pump, and a removable full top panel for convenient internal access.

What Customers are Saying

When looking to buy and install evaporative cooling systems, you should work with a professional company. One of the ways of identifying a reliable company is to go through reviews by customers who have worked with them in the past. Premier Industries Inc. is a business that continuously works to improve the products and services offered to consumers.

#1 Expertise and Experience

We have not only deep knowledge of the industry, but also extensive experience. For the more than three decades that we have been in the evaporative cooling segment, we have learned quite a lot, building on our mission to afford our clients' ideal cooling solutions. Our experience puts us in a great position to design and manufacture cooling solutions that meet the different needs of our customers.

#2 High-Quality Products

Buying an evaporative cooler costs a huge amount of money, making for a huge investment. Since we understand this, we manufacture high-quality products that are efficient, and will serve you for many years. When you buy our evaporative coolers for your space, you are assured of many years of reliable performance.

#3 Timely Response

The customers who worked with us in the past received the assistance and

products they wanted in good time. We value and appreciate all of the customers who choose to work with us. Regardless of your cooling needs, we will ensure that you enjoy a smooth and convenient purchase journey.

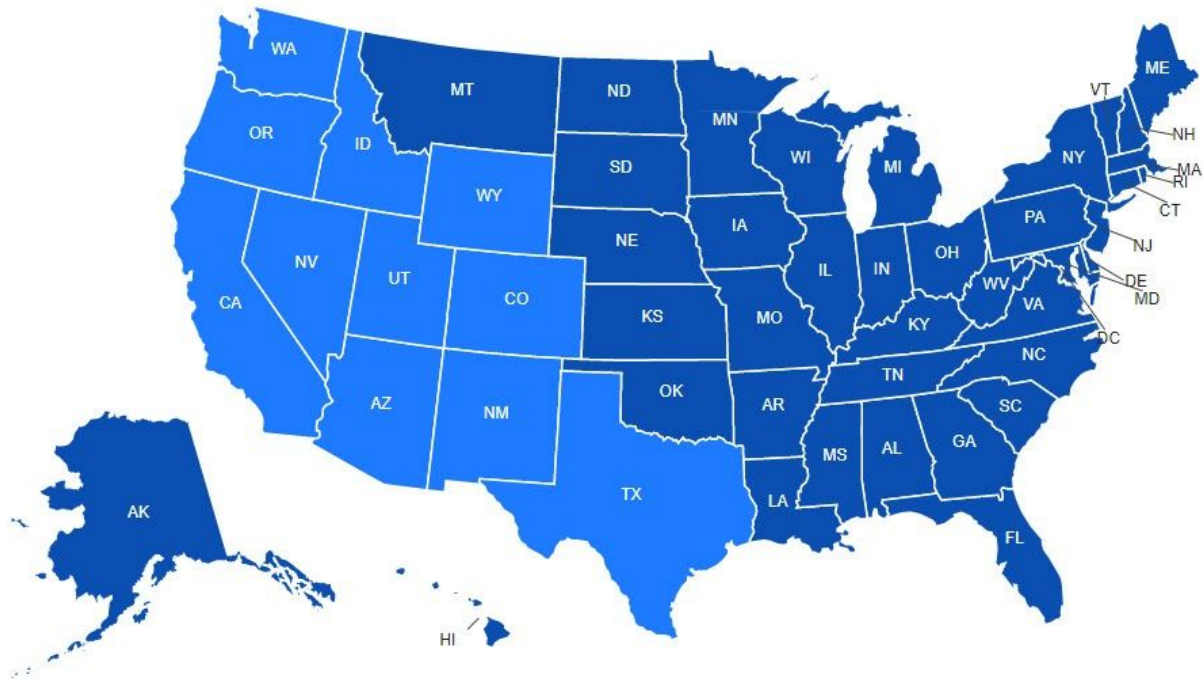

#4 Trustworthy

We ensure that all our products and services match our promise to customers. We are happy that our existing customers have found us to be a trustworthy and dependable business. Whether you are looking for an evaporative cooler, or want to get advice on an existing unit, you can always count on us.

#5 Excellent Customer Service

In addition to providing quality cooling solutions, we also strive to offer superior customer service. Today, we are proud and humbled that our customers regard us as a business with friendly, helpful, and efficient staff.

Locations We Serve

Since 1983, Premier Industries Inc. has grown and expanded its reach. Our expansion is fuelled by our desire to help more people access quality cooling products at affordable prices. We attribute the success we have enjoyed over the years to our friendly professional experts, and to our strong work ethic. Today, we have a wide range of products and serve not only Phoenix, but also the neighboring states in the Western half of the country. We can also provide evaporative coolers in California, Colorado, Idaho, Nevada, New Mexico, Oregon, Texas, Utah, Washington, Wyoming, and many more.

If you live or have a commercial space in any of the areas above, you have a reliable partner in us for all your cooling needs. Whether you want to buy an evaporative cooler or are not sure which cooling solutions are right for your space, we will be ready and happy to help.
